 Eurosatory 2022

Countdown to Eurosatory 2022: visit our stand to discover our latest optronics solutions and more...

The two-yearly Eurosatory exhibition is an unmissable fixture in the global defence and security calendar. It was at Eurosatory 2018 that Thales launched the new [Sophie Ultima Hand-Held Thermal Imager](#).

Then in 2020, we unveiled the [Sophie Optima](#) and the [Nellie Night Vision Goggles](#) during a live session that was held online because of the pandemic.

The [XTRAIM Weapon Sight](#) – a unique all-in-one night & day weapon sight for the dismounted soldier – made its debut in 2021 and will be one of the stars of the show at Eurosatory 2022.

If you haven't had the chance to catch up on our latest news, come and discover all our new equipment and developments on the Thales stand (C500 - outside area) at **Eurosatory 2022 in Paris from 13-17 June**.

Unrivalled accuracy in an uncertain world with the fourth-generation Sophie

Eurosatory 2022 will be a unique opportunity to preview a new Thales solution combining 4th generation Sophie products with Category I (**CAT I** or **TLE I**) coordinate extraction for **GNSS denied positioning** in hostile environments.

Operating in **GNSS-denied environments** has always been a major challenge for operational forces, and the new Category I target location error (TLE) capability can be critical to the success of their missions.

This latest patented innovation is **designed for all type of operational profiles** – from Special Forces with Sophie Ultima to infantry soldiers and squad leaders with Sophie Optima – and offers a simple and effective response to these two challenges.

Don't miss this chance to find out more on the Thales stand (**C500 - outside area**)!

Sign up for the preview and welcome reception

As a valued ambassador of our optronics products, you will have a unique opportunity to learn more about this latest development and to share your first impressions with us.

We look forward to seeing you on the stand!

Everything you need to know about the revolutionary XTRAIM all-in-one weapon sight

Thales's new [XTRAIM Weapon Sight](#) is a cutting-edge, all-in-one targeting solution designed to improve the observation and attack capabilities of dismounted soldiers in engagements at full rifle range as well as close combat.

The unrivalled capabilities of this revolutionary new product allow dismounted soldiers to engage effectively in both dynamic and static combat, day and night, with a single weapon sight.

As a Sophie Users' Club member, you have an exclusive opportunity to preview the XTRAIM white paper and find out everything you need to know about this new weapon sight.
