Discover XTRAIM Weapon Sight

XTRAIM: the latest day/night weapon sight for close combat

**XTRAIM
WEAPON SIGHT**
ALL-IN-ONE NIGHT/DAY
SOLUTION FOR
DISMOUNTED SOLDIERS

In less than
530g

- | Reflex targeting & shooting (both eyes open)
- | Decamouflage through fusion IR + VDO
- | Decamouflage through fusion IR + I²
 - All NVGs compatibility
- | Full night autonomy on IR
- | > 500 hours autonomy with reticle only
- | Infinite reticle customization
- | High precision aiming

Approximately 530 g, Thales's revolutionary new XTRAIM sight for dismounted soldiers and Special Forces is the most lightweight weapon sight of its kind in the world. Its unique all-in-one patented architecture allows for reflex firing at ranges consistent with assault rifles and light machine guns. With its unrivalled array of functions and features, XTRAIM offers enhanced day/night decamouflage capabilities by merging a direct view optic with a red dot sight and an infrared channel to engage targets in daylight and at night with an outstandingly high first hit probability.

Throughout the product development process, Thales engineers worked with end-users to understand their needs in terms of situational awareness, ergonomics, maintainability and scalability to incorporate smart new features and connectivity functions.

The solution is 100% designed by Thales and assembled in France at our Saint-Héand site, centre of excellence for soldier optronics where Minie and Nellie NightRise night vision goggles are also manufactured.

THALES EVENTS: The Sophie Users' Club goes on the road

As you may know, the [long-established Sophie Users Club](#) has become the Sophie Tour. In October, the first stage of the tour was held over two days at the [French paratrooper training centre](#) (Ecole des Troupes Aéroportées – ETAP) in Pau, south-west France.

Customers and users from all over Europe had an opportunity to try out Thales's new soldier optronics solutions [in real-life](#) conditions and to learn more about our latest products and services in an operational setting.

True to the traditions of the Sophie Users Club, they also had plenty of opportunities to share their own thoughts and ideas and to interact with Thales experts and other users.

"ETAP was delighted to welcome the Sophie user community, which has been involved in all of France's latest operational engagements alongside paratroopers" said ETAP Commanding Officer.
